

## Recycling your used oil filter is...

good for the environment  
and good for the economy!

- 1) When you recycle your used oil filters, they are collected and transported to a FILTER RECYCLING facility.
- 2) They are shredded; and the trapped used oil is separated from the steel.
- 3) The steel is taken to a steel mill facility where it is melted.
- 4) Your used oil filters are recycled into rebar, ready for use in construction

## Reciclar el filtro de usado es...

bueno para el medio ambiente  
y bueno para la economía.

- 1) Cuando recicla, su filtro usado se colecta y se transporta a un centro para reciclar.
- 2) Entonces los filtros se muelen y el aceite se separa del acero.
- 3) El acero a llavado a un fundidora donde es derretido.
- 4) ...y finalmente, su filtro usado es reciclado en barras de acero.
